

- High Quality Mixed Resin

This resin is an extremely high quality, pure mixer-bed resin, specially formulated for the deionisation of water in wire EDM machines. This resin offers many traditional hours of service life over ordinary products, and reduces downtime required for frequent resin changes.

Distinctive "sparkle" and rich golden color makes it instantly identifiable.

Features

- Excellent physical and chemical characteristics
- Surface operated by metal mold improved
- Specially made for Wire EDM Machinery
- Great resistance against heat
- Long resin life therefore reduced replacement costs
- Anti rust
